HELLENIC ASSOCIATION OF PHARMACEUTICAL COMPANIES

The American College of Greece

DEREE

School of Continuing and Professional Studies

INTRO TO CLINICAL RESEARCH

This module will cover the main aspects of clinical research. Upon completion, participants will have learned what clinical research is, the rules and regulations under which it is performed, and will have acquired high level insights in five therapy areas as well as best practices in the field. All topics will be taught by professional practitioners, researchers and academics with years of experience on the subject.

Who should attend:

- University graduates planning to apply to the medical department of pharmaceutical companies
- New employees of pharmaceutical company medical departments or collaborative research groups
- Medical doctors and nurses who wish to understand more about clinical research
- Pharmaceutical company sales and marketing employees who wish to focus their careers on clinical research

ADVANCED CLINICAL RESEARCH

Following years of experience in the pharmaceutical industry, attendees will learn in detail the principles of clinical development as well as the most recent trends in these fields.

Who should attend:

- Medical Directors
- Medical Advisors
- CPMs
- Senior CRAs
- Researchers
- Scientists
- Healthcare Professionals (MDs and Pharmacists)

PHARMACOVIGILANCE

This module is designed for professionals with experience in the pharmaceutical industry, and is focused on continuous learning in the field of pharmacovigilance. It will offer an overview of the principles of pharmacovigilance and will describe the latest changes both in data capture and analysis with regard to benefit-risk ratio including current pharmacoepidemiology developments.

Who should attend:

- Pharmacovigilance professionals
- Medical Advisors
- MSLs
- CPMs
- CRAs
- Healthcare Professionals (MDs and Pharmacists)
- Scientists
